“Management Studies has a wide range of courses which have given me a solid foundation for furthering my studies and planning my career. We learn about organizational procedures, professional communication, the importance of strong ethics, and so much more. My personal favorite course is Inuktitut Language for Business because it rekindled my interest in learning Inuktitut. After graduation, I plan to find a meaningful position in my community and combine my studies in management and psychology to help people as best I can in mental health services.” **Big Congratulations to you, Pam, from Sakku Investments Corporation!!**
