

Congratulations to our 2022 Scholarship Recipients!

My name is Riley Adams Lachance; good day.

I'm a second-year management student who lives in Rankin Inlet, Nunavut. I chose to enroll in this study because I wasn't sure what I wanted to do with my life, but after only completing the first year, I have a great variety of choices and a much clearer idea of what I want to accomplish in the future. One of my ambitions is to work for an Inuit company so that I can contribute back to my community and Nunavut. I also want to move south to finish my third and fourth years so that I may establish my own business that will also assist Inuit.

Accounting is perhaps one of my positive learning environment because, despite being extremely difficult, I was able to succeed when I didn't think I could!

My Name is Cecile Noolook, I am in the Office Administration program in Fort Smith, NT. This program takes two-years to finish with a diploma certificate. This program teaches us things to become an assistant in any office job, we are learning how to do things in HR, in accounting and learning how to do daily tasks of being an assistant. These include using Microsoft applications like word, excel, PowerPoint. My favorite subject in this course would be, business writing, learning to use proper words in a sentence, learning better English and when to use punctuation. Once I graduate my plan is to start an assistant job anywhere in Canada that'll help me provide for my daughter and son as they grow up.

I am on track for a business/economics degree both of which I am very fond of. My intro to economics class was my favourite so far and I am looking forward to taking more classes in that field of study. After I graduate, I plan on working back home in Nunavut. I am hoping to work for an Inuit owned organization so that I can help Nunavut grow as a territory and give back to my home that has always helped me reach my goals.

Thank you,
Qaritaq

Congratulations & good luck with your educational plans now and in the future!!
